

**MINUTES OF THE MEETING OF THE BOARD OF DIRECTORS
OF 2 JANUARY 2026**

Date	21 January 2026, 16:30 – 19:00 (Paris-Time)
Place	8 rue Jean Antoine de Baïf, 75013, Paris
Attending the meeting	Directors (voting members) Mrs. Elsane Guglielmino (Admin.) Mrs Charlotte Froehly (Admin.) Mr. Laurent Vernier (Admin.) Mr. Willy Deslandes (Admin.) Mr. Romain CLEMENT (CEO & Co-founder) Observers / Guests Mrs. Marie Feltesse (Partner TMV) Mr. Maximilien Ourself (Associate Pleiade)
Absent, but excused	
Representatives of management	Mr. Patrick PIERRE (Co-founder)

AGENDA OF THE BOARD OF DIRECTORS

Governance & communication: responsiveness and operating rules	Information / alignment
CEO report – 2025 performance review (commercial, product, team)	Information
2026 plan – Go-to-market and sales organization (US focus)	Information / recommendations
Recruitment – mandate to reinforce US sales team (Senior Sales profile)	Approval in principle (subject to final docs)
Financing – Bpifrance / EU: 1.5M€ package (grant + loans) and Idemo 6M€ status	Approval in principle / Information
Financial & accounting topics – reporting reliability, revenue recognition, audit readiness	Recommendations
CEO support topics – coaching, PR/lobbying, messaging	Recommendations
Next steps, action plan and closing	Information

OPENING OF THE MEETING

The CEO welcomes the attending Directors, management representatives and guests and opens the meeting. After observing that the Directors have been duly convened in compliance with the Articles of Association, the Chairman notes that the quorum is established.

1. GOVERNANCE & COMMUNICATION – EXPECTED RESPONSIVENESS

Several Directors raised concerns regarding delays and lack of acknowledgement on important email threads (in particular when Board input is required). The Board stressed that, beyond convenience, responsiveness is an essential governance signal and may impact external perception (clients, partners and investors).

The CEO acknowledged the issue, apologized for recent delays and confirmed that this is not the intended standard. The CEO explained that some delays occurred while waiting for missing information and documents, and committed to improving communication even when an answer cannot be provided immediately.

Operating rule agreed during the meeting: as a baseline, emails requiring action or acknowledgement should receive (i) a reply within 48 hours on working days or (ii) within 96 hours when a weekend is involved. When the full answer is not available, an interim acknowledgement should be sent with an expected timeline for the full response.

2. CEO REPORT – 2025 PERFORMANCE REVIEW

The CEO presented a retrospective on FY2025, highlighting that the year was operationally challenging (team capacity constraints and execution bottlenecks) but positive in terms of product progress, pipeline development and strategic positioning.

Key points discussed:

- Commercial: 2025 revenue billed of approximately 410k€; end-of-year invoicing remains structurally concentrated in Q4.
- Pipeline: total pipeline communicated at c. 5.5M€, with significant increase driven by intensified outreach and partner support.
- Go-to-market execution: capacity constraints in 2025 led to slowed delivery for certain clients and created inertia in closing cycles; the Company is now addressing this through staffing and process improvements.
- Product: consolidation of the Company's AI models into a single unified platform ('one spearhead product') was delivered; a public-facing website refresh and broader platform positioning are planned for early 2026.
- Team: recruitment of key profiles at year-end / early 2026 (US Sales leadership, technical seniority, finance support).
- Cash / burn: management indicated an expected run-rate of approximately 250-300k€ per month once the 2026 hiring plan is completed; break-even is projected around mid-2027, subject to execution.
- 2026 outlook: management presented a revenue ambition of approximately 2.0M€ for 2026, with c. 0.8M€ already secured/committed at the time of the meeting (including ~0.25M€ expected from an existing program in April 2026).

Guest presentation: the newly hired Senior Scientist shared his approach to integrating domain (medical/biological) expertise early in the product lifecycle, stressing that robust scientific grounding and multidisciplinary methods are essential to deliver reliable toxicity/efficacy predictions and to build trust with clients and regulators.

The Board requested that future reporting distinguishes clearly between: (i) invoiced revenue vs. revenue recognized under accounting rules, (ii) recurring vs. non-recurring revenues, and (iii) renewals / expansion from existing clients vs. new logos.

3. 2026 PLAN – GO-TO-MARKET, SALES ORGANIZATION AND GEOGRAPHIC FOCUS

The CEO presented the 2026 priorities: (i) drive adoption and scale usage of the unified platform, (ii) onboard and ramp the new sales organization, and (iii) secure cash and non-dilutive financing while preparing the next growth inflection.

Key discussion points and guidance:

- Geography: the Board supported the view that the US market (notably Boston) is currently the most favorable in terms of sales velocity, hiring pool and unit economics.
- Europe coverage: while Europe remains relevant (existing clients and national ecosystem stakes), the Board cautioned against allocating disproportionate commercial bandwidth to a dedicated European sales hire before the US motion is stabilized.
- CEO bandwidth: the Board stressed that the CEO must preserve time for strategic relationships (regulators, strategic partners, investors) and avoid being absorbed by day-to-day sales operations.
- Sales enablement: the Company has prepared an updated sales training / documentation pack for the US market and will continue to refine it based on field feedback.
- Execution cadence: the CEO shared that daily pipeline reviews are held with the team; the Board encouraged maintaining a disciplined cadence and objective KPIs (conversion rates, cycle length, weighted pipeline, close-won).

The Board recommended that, within one month, management formalizes a concise 'commercial roadmap' including clear targets, responsibilities across the sales team, and a travel cadence for the CEO in the US (e.g., one week every 6–8 weeks) with pre-scheduled strategic client meetings.

4. RECRUITMENT – REINFORCEMENT OF US SALES

Management presented the rationale for adding a second senior US sales profile in addition to the recently hired Head of US Sales (Boston-based). The candidate presented is described as a highly experienced sales profile with relevant network and track record in the Company's target ecosystem.

- Cost and ramp assumptions discussed: the fully-loaded cost is estimated at around 300k€ per year (including variable compensation and employer taxes), with a modeled ramp period of c. 9 months. A conservative annual booking objective of at least 500k€ was discussed for year one.
- Board guidance: the Board requested a fast decision (target within one month) and a clear definition of success criteria and probation / termination conditions. The Board also emphasized the need for the CEO to actively support the first meetings and key negotiations to increase close probability.
- Approval in principle: the Board expressed support for the recruitment direction, subject to receipt of the final compensation package, budget impact and KPI plan. A formal approval will be completed through written consent once the final documents are circulated.
- **To be approved** : the Board was yet to express an approval on recruitment of a European head of sales, but did express its concern over work overload that could happen at the CEO's level if the position was not staffed.

5. FINANCING – BPI / EU 1.5M€ PACKAGE AND IDEMO 6M€ PROCESS

Management presented an overview of non-dilutive financing topics: (i) a 1.5M€ package combining grants and loans (Bpifrance / EU-related instruments) and (ii) the Company's selection for the second stage of the Idemo program, with an oral pitch scheduled for 28–29 January 2026 in Paris.

The 1.5M€ package was described as follows:

- c. 400k€ in grant(s).

- Loan instruments with maturity of up to 8 years and a grace period of around 36 months (terms to be confirmed in the final term sheets).

Management indicated that the instruments are bundled (all-or-nothing) within the program framework.

The Board asked management to provide the full term sheets and the detailed 2026 budget (including cash runway assumptions) to enable a formal vote.

Regarding Idemo (c. 6M€), the CEO highlighted that the program is oriented toward scaling mature platforms and building European champions. The Board encouraged management to prepare thoroughly for the oral pitch and to leverage the strength of strategic partners and regulatory traction in the narrative.

6. FINANCIAL & ACCOUNTING TOPICS – REPORTING RELIABILITY AND AUDIT READINESS

The Board identified a need to improve accounting reliability and comparability, specifically on revenue recognition and the treatment of deferred revenue ('produits constatés d'avance'). The Board noted that the absence of deferred revenue in the accounting statements is unusual for a company with multi-period contracts and should be reviewed and corrected as needed.

The Board recommended initiating a process to evaluate and potentially change the accounting firm to a firm better suited for a high-growth company. The Board noted this does not need to be completed in Q1 2026, but should be prepared in advance of future fundraising, major non-dilutive financing and increased regulatory scrutiny.

In addition, given the increasing level of public funding and the strategic importance of financial statements for partners and financiers, the Board recommended exploring statutory audit / external audit arrangements as a good practice.

7. CEO SUPPORT TOPICS – COACHING, PR/LOBBYING AND MESSAGING

The Board emphasized the CEO's role as the public face of the Company, particularly toward regulators, industry conferences and strategic partners. The Board recommended defining a small number of stable messaging pillars (e.g., industrialization, sovereignty, economic impact) and aligning communication across stakeholders.

The CEO shared that exploratory discussions were held with PR / public affairs providers, including high-budget lobbying options in the US. The CEO expressed caution regarding overly heavy approaches and indicated preference for targeted, evidence-driven positioning.

CEO coaching: the CEO confirmed that meetings have been scheduled with the recommended coach within the next two weeks.

8. ACTION PLAN – KEY DELIVERABLES

The following action items were recorded during the meeting:

#	Action	Owner	Target date
1	Circulate detailed 2026 budget (full lines) and cash runway assumptions.	CEO / Finance	01 Feb 2026
2	Circulate term sheets for the 1.5M€ package and launch written-consent approval workflow.	CEO	01 Feb 2026
3	Provide an updated reporting pack: recurring vs non-recurring, invoiced vs recognized, new logos vs renewals/expansion, weighted pipeline.	CEO / Finance	15 Feb 2026
