

Board #1

Jan. 2026

Agenda

Board focus :

1- 2025 Feedback : what happened, which results, how we prepared for a stellar year

2- 2026 ArcaScience Dream Team - 1 mandate to vote

3- Sales management – Help me lead our new sales capabilities

1. CEO's take and Market update	<i>Information</i>
2. Finances	
2.1 2025 result metrics & new funding sources – Voting required	<i>Information / Approval</i>
2.2 2026 Budgets	<i>Information</i>
3. Product	
3.1 New platform first results	<i>Information</i>
3.2 World Models update & ArcaScience Product Positionning Update	<i>Information</i>
4. Sales	
4.1 Strategy & Positionning	<i>Information</i>
4.2 Projections	Information
4.3 Pipeline	<i>Information</i>
6. Governance	<i>Information / Approval</i>
7. Recruitments	
7.1 US – Appointment of secondary US Sales	<i>Approval</i>
7.2 EU – Appointment of primary EU Sales	<i>Approval</i>

Agenda

1. CEO's take and Market update	<i>Information</i>
2. Finances	
2.1 2025 result metrics & new funding sources – Voting required	<i>Information / Approval</i>
2.2 2026 Budgets	<i>Information</i>
3. Product	
3.1 New platform first results	<i>Information</i>
3.2 World Models update & ArcaScience Product Positioning Update	<i>Information</i>
4. Sales	
4.1 Strategy & Positioning	<i>Information</i>
4.2 Projections	<i>Information</i>
4.3 Pipeline	<i>Information</i>
6. Governance	<i>Information / Approval</i>
7. Recruitments	
7.1 US – Appointment of secondary US Sales	<i>Approval</i>
7.2 EU – Appointment of primary EU Sales	<i>Approval</i>

CEO's Take and Market update

(UNDER REWRITING)

- 2025 update
- Moving to the next validation step for €6M funding with I-Demo – Partnership with Google Deepmind's & AMI's (Yann LeCun & Alex Lebrun) chiefs under discussion
- 1,2€M new funding needs approval of the board
- High quality team onboarded, unicorn-compatible : now we are seeking the J-curve ignition event

Agenda

1. CEO's take and Market update	<i>Information</i>
2. Finances	
2.1 2025 result metrics & new funding sources – Voting required	<i>Information / Approval</i>
2.2 2026 Budgets	<i>Information</i>
3. Product	
3.1 New platform first results	<i>Information</i>
3.2 World Models update & ArcaScience Product Positioning Update	<i>Information</i>
4. Sales	
4.1 Strategy & Positioning	<i>Information</i>
4.2 Projections	<i>Information</i>
4.3 Pipeline	<i>Information</i>
6. Governance	<i>Information / Approval</i>
7. Recruitments	
7.1 US – Appointment of secondary US Sales	<i>Approval</i>
7.2 EU – Appointment of primary EU Sales	<i>Approval</i>

2.1 2025 result metrics & new funding sources – Voting required

Year 2025 emerges as a disappointing year with:

- Revenue of 410k,
- And a pipeline of 5.5M€ showing strong growth in the last quarter.

Environmental Factors:

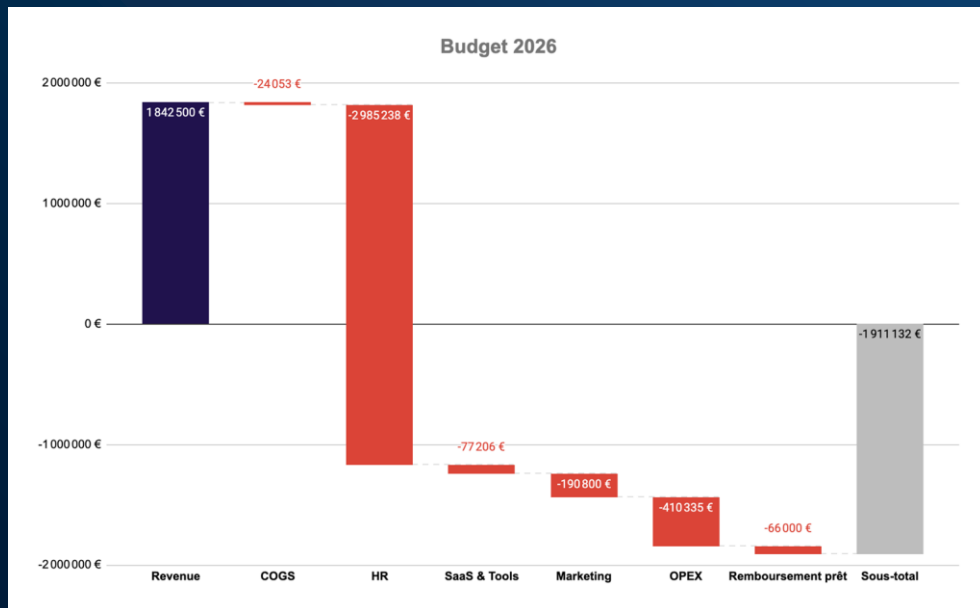

- S1: Trump tax policy generated changes in pharma sector
- Summer: Customer internal transformations
- S1: Platform delivery requires internal investment
- S1: Fundraising roadshows

Achievements:

- BRA platform ignition
- A new US sales representative
- Selection of a BD (Business Developer) in Europe
- Growth teams structuration
- Redesign of the website and sales materials
- Regional Regulatory Authority pre-approval of our platform

2.1 2025 result metrics & new funding sources – Voting required

2.2 2026 Budgets

Top line : forecast 1.8M€

HR : 3M€

COGS : 24k€

SaaS & tools 77k€

Marketing expenses : 190k€

OPEX : 410k€

Loan repayment : 66k€

Position cash

2026 Opening treasury : 3.5M€

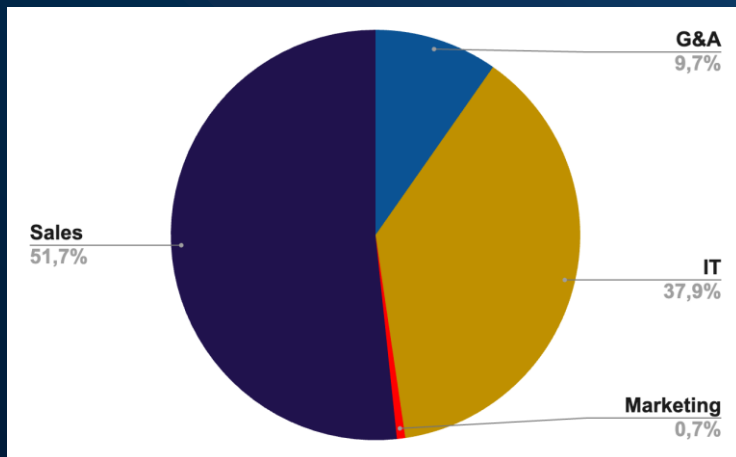

New fundings : 1.2M€

Fees : 240k€

Burn 2026 : 1.9M€

Cash end of the period : 2.77M€

2.2 2026 Budgets

HR distribution

Sales : 1.5M€ (6 ETP incl 2 sales US)

IT : 1.1M€ (13 ETP)

G&A : 290k€ (2.5 ETP)

Marketing : 20k€ (2 ext)

Total ETP : 23

All deals billed and to be billed

Company	Value	Effective date of deployment	Comment
Biocodex	11 k€	Q1 25	Disease exploration
Dillon technologies	12 k€	Q2 25	Agreement extension by FDA
UPSA	52 k€	Q4 25	RFP for operational launch in January
Dillon technologies	25 k€	Q4 25	Annual cost for technology deployment
ICON	60 k€	Q1 26	PSUR internal automation
MRT (Group ICON)	150 k€	Q1 26	Providing structured dataset with Endpoints
Biocodex	80 k€	Q1 26	Identified BRA project on a new pathology
VIDAL	189 k€	Q1 26	Depend on the new AI manager
NS PARK (APHP)	100 k€	Q1 26	Budget & technology validate + 60k of licence for deployment

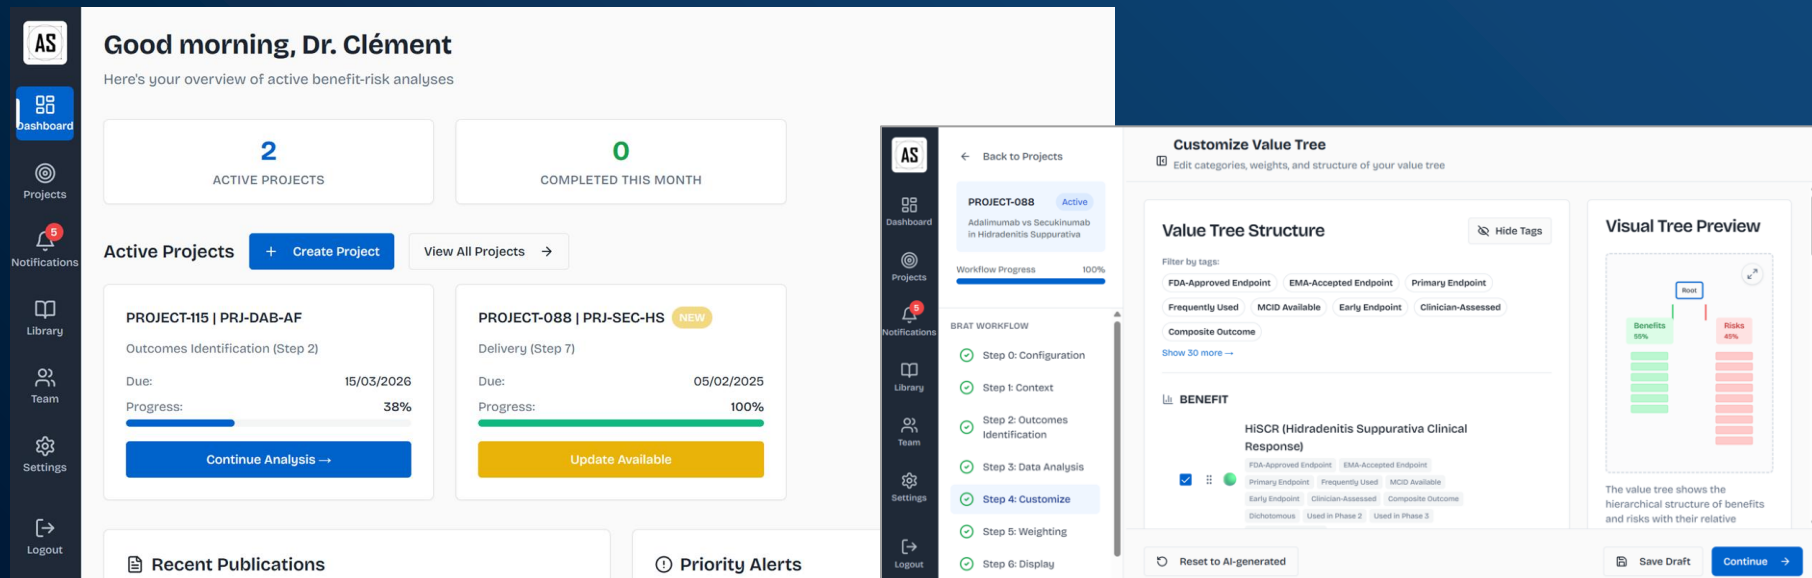

We are focusing this end-of-the year on locking down on our existing clients, while adding some very fitted opportunities on top, like NS Park.

This allows us to onboard the right sales in the meantime and to make sure we are fully set for scaling next year with the new deployment team.

Agenda

1. CEO's take and Market update	<i>Information</i>
2. Finances	
2.1 2025 result metrics & new funding sources – Voting required	<i>Information / Approval</i>
2.2 2026 Budgets	<i>Information</i>
3. Product	
3.1 New platform first results	<i>Information</i>
3.2 World Models update & ArcaScience Product Positioning Update	<i>Information</i>
4. Sales	
4.1 Strategy & Positioning	<i>Information</i>
4.2 Projections	<i>Information</i>
4.3 Pipeline	<i>Information</i>
6. Governance	<i>Information / Approval</i>
7. Recruitments	
7.1 US – Appointment of secondary US Sales	<i>Approval</i>
7.2 EU – Appointment of primary EU Sales	<i>Approval</i>

3.1 New platform first results

The screenshot displays the ArcaScience platform interface, divided into two main sections: a project overview dashboard and a value tree customization tool.

Project Overview Dashboard:

- Greeting:** "Good morning, Dr. Clément. Here's your overview of active benefit-risk analyses."
- Summary Cards:**
 - ACTIVE PROJECTS: 2
 - COMPLETED THIS MONTH: 0
- Active Projects:**
 - PROJECT-115 | PRJ-DAB-AF:** Outcomes Identification (Step 2). Due: 15/03/2026. Progress: 38%. Button: "Continue Analysis →".
 - PROJECT-088 | PRJ-SEC-HS:** Delivery (Step 7). Due: 05/02/2025. Progress: 100%. Button: "Update Available".
- Navigation Sidebar:** Dashboard, Projects, Notifications (5), Library, Team, Settings, Logout.
- Bottom Bar:** Recent Publications, Priority Alerts.

Value Tree Customization Tool:

- Back to Projects:** PROJECT-088 (Active). Workflow Progress: 100%.
- BRAT WORKFLOW:**
 - Step 0: Configuration
 - Step 1: Context
 - Step 2: Outcomes Identification
 - Step 3: Data Analysis
 - Step 4: Customize (Selected)
 - Step 5: Weighting
 - Step 6: Display
- Customize Value Tree:** Edit categories, weights, and structure of your value tree.
 - Value Tree Structure:** Filter by tags: FDA-Approved Endpoint, EMA-Accepted Endpoint, Primary Endpoint, Frequently Used, MCID Available, Early Endpoint, Clinician-Assessed. Composite Outcome. Show 30 more →.
 - BENEFIT:** HICSR (Hidradenitis Suppurativa Clinical Response). Tags: FDA-Approved Endpoint, EMA-Accepted Endpoint, Primary Endpoint, Frequently Used, MCID Available, Early Endpoint, Clinician-Assessed, Composite Outcome, Dichotomous, Used in Phase 2, Used in Phase 3.
 - Visual Tree Preview:** Shows a hierarchical structure of benefits (55%) and risks (45%).
- Buttons:** Reset to AI-generated, Save Draft, Continue →.

Reduce BRA Project Time by 80%¹

¹: independent BRA experts evaluation, 2025

3.1 New platform **first results** : Existing stack of products Six Pre-Configured Study Types

Analysis of condition

Disease Analysis

Discover molecular pathways and epidemiological information about your disease

Current Treatments

Clinical Landscape + Efficacy Report

Access to a global synthesis of clinical activities with sponsors, treatments...

Benefits

Clinical Endpoint Study

Access to a accurate analysis of all clinical endpoint strategy for a pathology

Risks

Adverse Events Reports

Get a synthesis of all adverses events related to your drug and the standard of care

Benefit-Risk Assessment

Benefit Risk Assessment

Access to a summarized BRA regarding your priorities

Conclusion

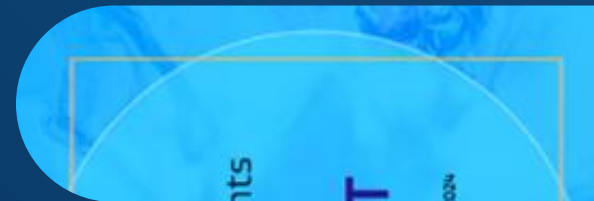

Benefit Risk Summary

Review a synthesis of your tailored benefit-risk analysis

Each Study Delivers Full Data Transparency and FDA-Compliant Documentation

3.1 New platform **first results** : Studies Alone Falls Short in Two Critical Areas

Agility in the BRA Process (Test & Learn)

Real-Time Updates

3.1 New platform **first results** : Our BRA Platform Manages Safety Team Priorities & Workflow

BRAT WORKFLOW

- ✓ Step 0: Configuration
- ✓ Step 1: Context
- ✓ Step 2: Outcomes Identification
- ✓ Step 3: Data Analysis
- ✓ **Step 4: Customize**
- ✓ Step 5: Weighting
- ✓ Step 6: Display

*Structured
& proven
BRAT
methodology*

Customize your BRA by having our engineers :

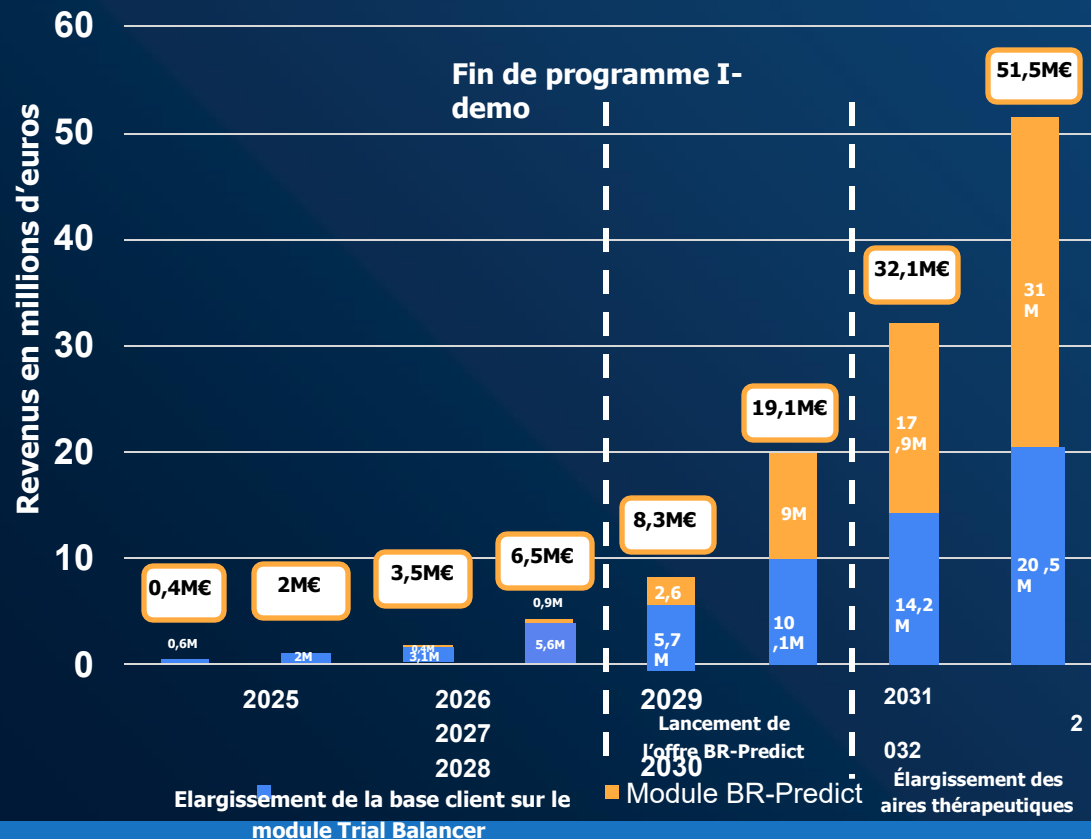

- Insert additional data sources
- Insert protocol design
- Select the intervention for benchmarking
- Select the appropriate outcomes
- Personalise your BR value tree and related visualisations
- Review AI general synthesis
- Generate intermediary studies

ArcaScience offers Human Oversight for Every Report

3.2 World Models update & ArcaScience Product Positioning Update

Récupération des données des différentes bases de données inclues essais cliniques	☒	Fonctionnalités intégrées à la plateforme
Harmonisation des données cliniques des traitements à comparer	☒	
Aide à la compréhension du contexte clinique	☒	
Aide à la construction du protocole clinique	☒	
Réalisation d'une analyse bénéfice-risque sourcée	☒	
Analyse de l'impact des interactions médicamenteuse	☒	
Intégration des données de structures moléculaires	☐	Fonctionnalités à développer grâce au programme I- demo
Intégration des données toxicologiques et pharmacodynamique des modèles précliniques	☐	
Intégration des données sur le polymorphisme génétique	☐	
Exploitation de données RWE pour enrichir les analyses	☐	
Exploitation de ces données dans un modèle prédictif	☐	

3.2 World Models update & ArcaScience Product Positionning Update

Justification des prévisions :

Le module Trial Balancer cible des molécules plus matures, qui sont par nature moins nombreuses dans les portefeuilles R&D. Pour soutenir la croissance, la stratégie repose donc sur un élargissement progressif du portefeuille client, en adressant les grandes biotechs, les mid pharmas et les big pharmas. Le nombre de molécules analysées passe ainsi de 3 en 2025 à 20 en 2028, puis atteint 135 en 2032

Le module BR-Predict voit une croissance exponentielle auprès des entreprises pharmas déjà clientes. L'offre prévoyant 2 analyses PoC en 2028, 46 molécules analysées auprès des clients Trial Balancer en 2030, puis atteint 199 en 2032. Cette croissance reflète l'intégration progressive du module sur l'ensemble des portefeuilles précliniques, rendue possible grâce à la stratégie de commercialisation menée en parallèle du programme i- Demo et de la très forte polyvalence de la plateforme.

Agenda

1. CEO's take and Market update	<i>Information</i>
2. Finances	
2.1 2025 result metrics & new funding sources – Voting required	<i>Information / Approval</i>
2.2 2026 Budgets	<i>Information</i>
3. Product	
3.1 New platform first results	<i>Information</i>
3.2 World Models update & ArcaScience Product Positioning Update	<i>Information</i>
4. Sales	
4.1 Strategy, Positioning & Pipeline	<i>Information</i>
4.2 Projections	<i>Information</i>
4.3 Pipeline	<i>Information</i>
6. Governance	<i>Information / Approval</i>
7. Recruitments	
7.1 US – Appointment of secondary US Sales	<i>Approval</i>
7.2 EU – Appointment of primary EU Sales	<i>Approval</i>

4.1 Strategy & Positioning Sales activities in 2025

First semester: Deliver key projects and try to secure multi-year contracts

Second semester : Formalize and scale the BRA platform sales methodology

4.1 Strategy, Positionning & pipeline : Sales activity & efficacy in progress

Semester 1 2025

Pipe value : 2 600 K€

Nb of opportunity created : 32

Semester 1 2026

Pipe value : 5 470 K€ **(+210%)**

Nb of opportunity created : 150 **(+468%)**

Deal Status	Amount
Targeted	3 860 000 €
R1 scheduled	695 000 €
Interested	35 010 €
R2 Scheduled	355 000 €
Techno validated	235 000 €
Financial offer validated	289 750 €

The S2 focus was to build a strong pipeline

Now it is growing every month

4.1 Strategy & Positionning : Focus on main deals

BP impact:
650 K€

Context:

ICON faced a scandal involving top management in September

Actions:

We diversified our outreach and generated 3 deals across the group (BRA, Cassandra & MRT)

BP impact:
120 K€

Context:

We delivered the first AI-Awaiting new features to re-powered BRA to a sponsor in July

Actions:

We engaged and convert this project

BP impact:
110 K€

Context:

To address their AI challenges, VIDAL decided to hire an AI manager who joined in November

4.2 Projections : Sales perspectives for 2026

In 2026, the targeted business model is :

- Yearly revenue of 1 840 K€
- ARR signed : 895 K€

Critical deals soon to be signed :

- MHRA
- Sanofi - Upsell
- IHI Childhood cancer

2026 Budget Assumptions:

- Sales team fully staffed by March
- BD ramp-up period: 9 months
- BD time to first invoice: 3 months
- Recurring revenue from new BD: 30%
- First platform delivery: April

Critical success factors for 2026:

- Sales onboarding excellence
- Convert regulatory stakeholders into active users
- Demonstrate cross-functional value across key positions in pharma groups
- Master public and scientific presentations

4.2 Projections : Sales perspectives for 2026

Two critical pivots for 2026:

1. Pipeline: from Partner-led to Self-generated
2. Product: from Multiple outputs to One BRA platform

Proving Points – We're Ready

- ✓ **Pipeline momentum building**: 50+ qualified opportunities in pipeline (January 2026)
- ✓ **Team at full capacity**: Sales & BD resources fully staffed and operational supported by CSO
- ✓ **Enterprise traction accelerating**: ICON BRA platform in procurement stage
- ✓ **Market validation confirmed**: Positive reception of BRA platform concept and demo
- ✓ **Go-to-market toolkit refreshed**: All sales and marketing materials updated and aligned
